MADAME MABELLE

The Mystery Woman—Ask Her—She Knows

No Meat for Her.

Mother gave the children an apple each. In little Marion's there was a worm hole that obviously had a tenant. "You take this one, Tommy," she said; "I'se a vegetarian."—Boston Transcript.

Wouldn't Take Advice.

Dot and her brother were playing on the woodshed roof and her brother fell into a barrel that was standing beneath it. Afterward she said to her mother: "I told him right away after he fell in that he should fall back again, but he wouldn't."

Daily Thought.

Nothing great was ever achieved without enthusiasm.—Emerson.

Glanders in the Cat Family.

Glanders is an ailment usually associated with horses, but an outbreak of this disease among the lions and tigers of the Rome zoological garden is reported in the Annali d'Igiene. The disease is known to have been transmitted from horses to lions, tigers and leopards, and the domestic cat was shown susceptible by laboratory inoculation.

To Remove Grease.

The following method, described in Popular Science Monthly, has been substituted for the use of gasoline and other light oils: Boil the parts in caustic soda lye; one pound to a gallon of water; then brush while the articles are hot. Caustic soda is recommended as better than ordinary soda, since it causes the fat or grease to dissolve more quickly.

Never Too Old to Learn.

It has often been said that a man cannot learn a new trade after he is forty, but this statement has frequently been disproved. Peter S. Du Ponceau was eighty when he wrote his valuable treatise on the Cochin Chinese language, and had only then recently taken up the study; and the late John Bigelow was still an author turning out a book when he passed his ninety-fifth birthday.

Prospects of Palestine.

Palestine has never had a well-defined boundary except the sea on its west, but it is understood to be about 10,000 miles in extent. Much of this area is too dry and rocky for tillage; large parts are too dry even for cattle or sheep.

Why Diamond Is Prized.

Of practical uses the diamond is not quite destitute—it is, for instance, the best of all abrasives—but these practical uses have almost or quite nothing to do with its popular esteem. That rests first on the poor claims established by cost and scarcity, and, second, on the survival in human beings of the ancient and savage delight in hanging about and fastening to the body bits of stone and metal that are brightly colored or shiny.

Look for the Large Chance.

The opportunity that is bigger than you are cannot help you, no matter how close it comes. To be worth anything, a chance must fit. Instead of simply waiting for your opportunity, grow up to it. Big people do not need to put up with small openings, and little people find it impossible to fill big ones. If you are growing all the time, and fitting yourself for the larger chances, you need not worry for fear they will fail to present themselves.

REMODELING SALE

During the time our store is being remodeled, we are offering our stock at remarkable sharp reductions.

Come and see how much lower the prices are than usual.

Don't fail to take advantage of this opportunity to buy high-grade goods at much below real value.
